

# ULTRASONIC CLEANING TANKS

- Compact ultrasonic devices made of high-quality stainless steel
- Complete with incorporated heating and temperature regulation
- With high-quality piezoelectric lead zirconate-titanate transducer elements (PZT)
- Homogenous excitation of the whole liquid volume
- Possibility of equipping the tanks with adequate accessories
- resulting in a complete system

**RSW**

## Fields of application:

Suitable for the cleaning of components with aqueous cleaning agents at a reasonable price in laboratories, in the quality assurance or for the small-lot production.

## TECHNICAL DATA

# RSW

### Accessories:

- Covers made of stainless steel
- Cleaning baskets
- Lifting and lowering device with oscillation
- Filtration
- Oil separator
- Rinsing tanks
- Hot-air drier

### Our delivery programme:

Cleaning and degreasing plants for aqueous agents, chlorinated and unchlorinated hydrocarbon solvents.
